

oilfino Kaltstartspray

PRODUCT PROPERTIES

oilfino Kaltstartspray considerably improves the starting of petrol and diesel engines and therefore prevents the engine and battery from damage.

AREA OF APPLICATION

For usage in vehicles, trucks and all kind of engines.

APPLICATION

Shake well before use. Spray the product directly into the air filter/intake line and start the engine immediately. For petrol engines push the accelerator pedal only slightly. For diesel engines start the engine without preheating at full throttle. Never spray the product directly onto the heating flange or the spark plugs! For temperatures below 0 °C spray additionally right after the first ignition.

Tip: With the help of a second person or a remote control the starting procedure of the engine is much easier because the engine can be started whilst applying the product.

CONSUMPTION

Dependent on contamination

Specific Data	Method	Unit	oilfino Kaltstartspray
Physical state			aerosol
Colour			clear/colourless
Odour			characteristic
Ignition temperature		°C	> 200
Density at 68 °F		g/cm ³	0,611
Upper explosion limit		Vol.-%	9,4
Water soluble			
Solvent content		%	100

Available Size PU
 200ml 12
